

We monitor the work environment to ensure we do not exceed safe limits on things such as noise, gases, airborne contaminants or particles.

Environmental Policy

Together we strive to be better every day by committing to working with the public, industry and regulatory bodies to protect the environment by reducing the environmental impacts associated with our operations, and the distribution and use of our materials.

Our Company does:

Manage Responsibly

We will maintain a management system which includes identification and evaluation of the environmental risks associated with our business activities.

Environmental Awareness

To promote sustainable practices - including material selection where practical and its effect on the environment.

Set/Review Environmental Objectives

We strive to achieve to set and review quantifiable environmental targets for each project.

Continued Commitment

A commitment to seek practical ways to mitigate environmental impact with continued commitment to improve.

Implementation

We are committed to implementing measures to reduce, reuse and recycle waste and prevent pollution.

It is important to us that our projects have a legacy of craftsmanship and endurance that both enhances our community and cities, and provides our clients with long-term quality turf.
